PROFESSIONAL SUMMARY

Process Engineer with 2-3 years of experience in **process modelling, material and energy balance development, equipment sizing**, and **P&ID/PFD drafting** across **energy, oil & gas, and industrial process** projects. Skilled in translating client requirements into functional process documentation, developing Process Data Sheets, and participating in preliminary risk analysis reviews including HAZOP. Currently completing an **M2 in Process Engineering and Artificial Intelligence** at **École des Mines de Saint-Étienne**. Fluent in English and developing French proficiency. Experienced in international, multidisciplinary client-facing environments; adaptable, rigorous, and team-oriented. The Clients, with whom I work:

EDUCATION

M2 - Process Engineering & Artificial Intelligence **Sep 2025 – Sep 2026**
École des Mines de Saint-Étienne, Saint-Étienne, France
Coursework: Process systems engineering, functional architecture of energy systems, process modelling, optimization methods, AI-driven design tools.

B.Sc - Chemical Engineering **Oct 2017 – Sep 2021**
NFC Institute of Engineering and Technology, Multan, Pakistan
Final-year project: Up-gradation of 18000 BPSD Vacuum Residue via Vis-breaking Unit thermal process modelling, material and energy balance, and equipment sizing for a non-catalytic thermal cracking unit.

WORK EXPERIENCE

Process Engineer **Dec 2023 – Aug 2025**
Brillante Engineers, Lahore, Pakistan

- Developed **material and energy balances** and **process models** for a greenfield gas processing facility using **ASPEN HYSYS** and **ProMax**; validated system behavior under varied operating scenarios.
- Sized equipment and produced **Process Data Sheets** (equipment and instrumentation sheets) for Inlet Separation, Amine Sweetening, Gas Dehydration, and Vapour Recovery units.
- Produced **PFDs, UFDs, and P&IDs**; ensured alignment with international engineering standards and client requirements through all design phases.
- Coordinated with multidisciplinary teams (refrigeration, compression, instrumentation, HSE) to resolve technical issues and manage sub-assembly integration.
- Participated in **HAZOP sessions** and prepared comparative summaries of utility and chemical consumption for client reporting.
- Performed **equipment sizing** and **debottlenecking analysis** for capacity expansion projects (e.g., Sujawal Gas Field from 20MMSCFD to 25–30MMSCFD).

- Prepared **Control Philosophy, Shutdown Philosophy, and Cause & Effect Diagrams**; developed detailed P&IDs for new instrumentation and control systems.

Trainee Process Design Engineer **Nov 2022 – Nov 2023**
SPEC Oil & Gas, Lahore, Pakistan / Dubai, UAE

- Modelled process units in **ASPEN HYSYS**; performed thermal design with **ASPEN EDR** and **HTRI/RCS Win** for heat exchanger sizing.
- Produced **BFDs, PFDs, UFDs, and P&IDs** in AutoCAD; conducted line-sizing and hydraulic calculations.
- Applied process safety principles and environmental compliance criteria in a regulated engineering environment.

TECHNICAL SKILLS

- **Process Modelling & Simulation:** ASPEN HYSYS, ProMax, ChemCAD, DWSim, ASPEN EDR (steady-state and thermal simulation, material and energy balance)
- **Equipment Sizing & Data Sheets:** Heat exchangers (HTRI, RCS Win, ASPEN EDR), pressure vessels, separation equipment, pipelines; Process Data Sheet preparation
- **Diagrams & Documentation:** PFD, P&ID, UFD, BFD – AutoCAD 2D; utility and chemical consumption summaries
- **Hydraulics & Sizing:** PIPENET PRO II, line sizing, hydraulic calculation reports
- **Process Safety & Risk Analysis:** HAZOP facilitation, preliminary risk analysis reviews, IOSH Managing Safely (UK certified)
- **Modelling & Programming:** MATLAB, Turbo C++, Python (in progress)
- **Reporting & Communication:** MS Office (Word, Excel, Outlook); client-facing technical reporting and supplier clarification

CERTIFICATIONS

IOSH Managing Safely – Institution of Occupational Safety and Health (UK) **Mar 2022 - Present**

LANGUAGES

- **Urdu:** Native
- **English:** Fluent (Independent User B2)
- **French:** Beginner (actively improving since September 2025; committed to achieving professional proficiency)
